

WEEK-1 SEPARATE WORK DONE :

SANTHOSH K-7376212IT221

Tasks Accomplished:

- Conducted initial research on project requirements and scoped out functionality.
- Designed the database schema (tables for consumables, categories, and users).
- Created an ER diagram for database design.
- Set up the project repository on GitHub and shared access with the team.

[JAYASURIYA J]-7376212IT160

Tasks Accomplished:

- Designed wireframes for the user interface (login, dashboard, and data input forms).
- Researched UI/UX best practices for management portals.
- Coordinated with the backend team for API requirements.

[PRAVEEN R-7376212IT201]

Tasks Accomplished:

- Researched technology stack and finalized tools (e.g., Node.js for backend, Angular for frontend).
- Installed and configured the development environment (Node.js, Angular CLI).
- Documented the project's technical requirements.

[RAKESH M-7376212IT208]

Tasks Accomplished:

- Drafted project scope and objectives document.
- Communicated with stakeholders to finalize user requirements.
- Created a task breakdown for the team using a project management tool.
